

School Leadership Training

In an effort to strengthen teacher effectiveness, build capacity in leaders and develop a culture of success, the Athari team will partner with school leadership to employ research based strategies that focus on Engaged Classrooms, Codes of Character, Conduct, and Support, School Climate and Safety, and Data Analysis.

Testimonial

I don't know that a more innovative, passionate, and dedicated leader in education exists. "Dr. Keisha" as the Chimes students call her, is a powerful advocate and skilled leader. Her ability to receive feedback, reflect on her own work, and constantly strive to do better shows her high emotional intelligence. I have watched her successfully motivate her team, navigate organizational politics and tough conversation, while always reminding colleagues of our "why" and mission. Keisha brings high energy, fairness, and tolerance for the unknown. She is a rare gem and I would gladly add her as a teammate in any role I could find for her, as her strengths are many!
